

# BCM CONSTRUCTION COMPANY INC.

Demonstrating Character by  
Delivering Results

# HI THERE!

---

At BCM Construction Company Inc., building isn't just our business—it's our legacy. For years, we've served agricultural, commercial, and industrial clients across many communities with a steadfast commitment to quality and integrity. As a family owned and operated business, our mission remains the same: delivering reliable, expert construction services that stand the test of time.

We know that every project starts with a vision and a leap of trust. At BCM, we take both seriously. Whether you have a fully-vetted plan or just a napkin sketch, we are here to turn your ideas into reality. With experience managing complex operations and technical builds, our goal is to make the construction journey as seamless as the final result.

Let's build something great together!

# ABOUT US

Since 1995, BCM has been a leader in Northern California's building industry. Founded by Kurtis Carman, BCM has evolved into a dedicated family-run operation with the second generation managing day-to-day operations.

We offer the sophisticated capabilities of a large firm delivered with the personal, welcoming culture of a family business. Our reputation is built on a simple belief: A project is only as strong as the team behind it.

## Why Choose BCM?

- **Modern Precision:** We combine decades of field experience with advanced project management and accounting accuracy to keep your project on track.
- **Quality First:** We may not always be the cheapest option, but we pride ourselves on getting the job done right—the first time.
- **Unmatched Standards:** From complex industrial sites to agricultural infrastructure, we deliver the highest quality craftsmanship in the North State.

# OUR **VISION**

At BCM, we are looking toward a future where:

- **Innovation Meets Integrity:** We utilize the latest project management technology without ever losing our "handshake" values.
- **Sustainable Growth:** We support the expansion of local industry and agriculture through durable, high-efficiency builds.
- **Generational Partnership:** We remain a family-led firm that our clients can rely on for the next thirty years and beyond.

# OUR TEAM

At BCM, our strength lies in our people. We recognize that every role—from the precision in the office to the craftsmanship in the field—is vital to a successful project. Because we believe in support over hierarchy, we operate with an inverted organization chart.

## **The Inverted Foundation**

In our model, our leadership serves as the foundation. We aren't at the top; we are at the base, providing the stability and resources the rest of the team needs to excel.

## **A Complete Building System**

We view our team like a structural system:

- **Interdependence:** Each member is a critical component of the whole.
- **Structural Integrity:** Just like a building, if one piece of the system is missing, the entire structure is compromised.
- **Collective Excellence:** Every employee has the responsibility to ensure the "BCM Standard and Values" are met at every stage.

•  
At BCM, we don't just hire workers; we empower the builders of our legacy. Without every member of this system, the building—and our mission—would fail.

# OUR SERVICES

## PRE-CONSTRUCTION

At BCM, we believe in getting it right the first time. Our pre-construction phase is a collaborative deep-dive into your project's goals, costs, and constraints. By providing expert guidance during the planning stages, we give you the confidence that your project will be delivered on time, on budget, and to the highest standard of quality.

## DESIGN-BUILD

We don't just say we turn sketches into structures—we prove it. Our Design-Build model simplifies your project by unifying design and construction under one roof: BCM. By acting as your single point of contact from beginning to end we streamline communication, accelerate the timeline, and take full accountability for the outcome. We take your initial vision and turn it into an exceptional, high-precision reality.

## PRE-ENGINEERED METAL BUILDINGS

BCM specializes in the design and erection of high-performance metal buildings. Offering a perfect balance of durability, speed, and cost-effectiveness, our steel systems are custom-tailored for agricultural, industrial, and commercial use. We combine high-grade materials with precision management to deliver a structure built to last.

## CONCRETE

Concrete is the foundation of everything we build. BCM provides expert concrete services tailored for heavy-duty facilities. From specialized equipment pads to expansive warehouse slabs, we deliver the precision and durability required to support your most complex operations.

# AGRICULTURAL CONSTRUCTION

At BCM, we don't just build for the agricultural industry; we are deeply rooted in it. We understand that in farming, your facility is a critical tool for your livelihood, and timing is everything. Our project management is built around your deadlines, ensuring construction always meets the harvest deadlines. We provide the rugged, high-precision infrastructure needed to support the backbone of Northern California's economy.

Our expertise covers the full spectrum of agricultural needs, including:

- **Processing & Storage:** We design and erect high-capacity processing plants, silos, and bulk storage facilities engineered for maximum operational flow.
- **Specialized Environments:** From advanced cold storage to secure fumigation enclosures, we build to the strict technical standards required for crop preservation.
- **Long-Term Reliability:** A building is only as good as its upkeep. We provide dedicated repairs and maintenance to ensure your infrastructure stands up to the demands of the seasons, year after year.

When you partner with BCM, you're working with a team that respects the grit, the history, and the future of the American farm. We deliver the foundations—and the specialized systems—that allow your operation to thrive.

# INDUSTRIAL CONSTRUCTION

In the industrial sector, precision is non-negotiable. BCM specializes in the construction and management of high-capacity facilities where structural integrity and operational flow are paramount. We understand that industrial projects often involve complex mechanical systems, heavy equipment requirements, and strict safety standards. Our team is equipped to deliver the rugged, high-performance infrastructure your business demands.

Our industrial expertise includes:

- **Manufacturing & Warehousing:** Designing and erecting expansive, clear-span facilities optimized for logistics and production.
- **Specialized Foundations:** Expertly poured equipment pads, mezzanine supports, and high-tolerance slabs designed to handle heavy machinery and constant vibration.
- **Facility Improvements & Retrofits:** From structural repairs to specialized plant expansions, we minimize downtime to keep your operations moving.
- **Safety & Compliance:** We build to the highest technical standards, ensuring your facility meets all industrial codes and environmental regulations.

At BCM, we bridge the gap between complex engineering and on-the-ground execution. We provide the stable, high-precision environment your industry needs to operate at peak efficiency.

# COMMERCIAL CONSTRUCTION

A commercial building is more than just a structure—it is the face of your business. At BCM, we specialize in creating functional, high-quality environments that balance aesthetic appeal with long-term operational efficiency. From modern office spaces to retail centers and specialized professional facilities, we deliver projects that help your business thrive.

Our commercial expertise includes:

- **New Construction & Site Development:** Comprehensive management from the conception to the grand opening.
- **Tenant Improvements & Remodels:** Transforming existing spaces into modern, efficient environments tailored to your specific workflow.
- **Mixed-Use & Retail:** Durable, high-traffic structures designed for both beauty and heavy-duty performance.
- **Precision Finishing:** Expert concrete work, high-grade steel framing, and meticulous attention to detail that sets your professional space apart.

We understand that time is money in the commercial world. We provide transparent communication and strict schedule management to ensure your doors open on time and your project stays on budget.

# PUBLIC WORKS CONSTRUCTION

BCM is a proud partner in building and maintaining the infrastructure of our local communities. We understand that public projects demand a higher level of oversight, strict adherence to safety regulations, and a commitment to long-term value for the taxpayer. From municipal facilities to essential utility infrastructure, we deliver the structural integrity and professional management required for public-sector success.

Our public works expertise includes:

- **Infrastructure & Utilities:** Specialized concrete and steel solutions for the systems that keep our cities running.
- **Municipal Facilities:** Constructing and maintaining durable, high-traffic buildings designed for decades of service.
- **Compliance & Excellence:** We operate with total transparency, meeting all prevailing wage, bonding, and reporting requirements with the same "accounting precision" we bring to every BCM project.
- **Community Impact:** As a local, family-owned business, we take personal pride in building the schools, parks, and facilities that our own families and neighbors use every day.

When the project is funded by the public, there is no room for error. BCM delivers the structural integrity and professional oversight that local government demands.

# CLIENT TESTIMONIALS

BCM showed they are a great company all through the process, from design to completion, they were easy to do business with. Taking time to hear my needs, and coming up with solutions was comforting since this was the first build from scratch project I had ever done. They finished 3 months ahead of schedule and on budget! The superintendent was very impressive and clearly had a great work ethic. Days when I showed up unexpected to see the progress, he was always out of the job shack working or cleaning. Our project included almost 1500 yards of concrete covering 2.5 acres. He would show up 3 hours early for a 3 AM pour to make sure no detail had been overlooked. Everyone I met that worked for BCM was clean, polite, and a joy to be around! From the owner to the guy in the ditch with a shovel they are a great team of people!

Alex DuBose  
Owner  
Rental Guys

So grateful I was referred to BCM Construction for my project. After having several other contractors come and give me their (mostly unwanted) opinions and high prices.. BCM showed up with nothing but respect for me, my ranch, my time and animals! They not only did an AMAZING job, they kept me in on the process the entire time! Every step of the way they were there doing their thing and making it all go oh-so-smoothly. I didn't have to worry about a single thing, and everything they said would happen, did! I could not recommend anyone any higher than BCM! (and have, to many people already and will continue to do so!)

Jodi Tuft  
Valley Horse Center  
Red Bluff, CA

I couldn't be happier with the shop BCM put up for me. The quality is top-notch, and the crew was professional from day one. If you're looking for a team that does what they say they're going to do, BCM is the way to go.

# CLIENT TESTIMONIALS

BCM Construction delivered a top-tier collision center that perfectly supports our dealership's high-volume operations. They expertly balanced the heavy-duty technical requirements of a modern repair facility with a clean, professional design that aligns with our brand. The project was handled with precision, resulting in a high-performance space we are proud to use.

Brad Miller

Body Shop Manager

Chuck Patterson

Over the last 30 years, Kurt and Scott have worked closely with us on many projects. They have erected several buildings including office, warehouse, and hulling facilities and have poured acres of concrete for us, always delivering high-quality work. They are professional, reliable, and innovative, consistently helping us find solutions to unique situations. We greatly appreciate their expertise and would recommend BCM Construction to anyone looking for top notch commercial construction services.

Ronald E. Keyawa

President

Keyawa Orchards, Inc.

Our experience with BCM covers the entire spectrum of construction. From the complex engineering and construction of our concrete silos to small maintenance projects. BCM treats every task with the same level of professionalism and expertise. Their versatility and commitment to quality make them our first call for any project at BUCRA.

Carl Hoff

President/CEO

Butte County Rice Growers Association

BCM Construction completed a new medical office for my husband and me. We truly appreciated the time the team took to listen to our needs and turn our vision into a reality. BCM perfectly balanced the technical demands of a medical facility with a design that feels welcoming to our patients. We couldn't be happier with our new office. We really enjoyed working with BCM. They made our build project smooth and predictable. We highly recommend BCM Construction.

Drs. Randal & Christine Sloop
